

**GBRC OCTOBER ONLINE EDUCATION EVENT
IN PARTNERSHIP WITH USGBC TEXAS:**

GREEN BY DESIGN PETER PFEIFFER, FAIA

Peter Pfeiffer, FAIA
Barley|Pfeiffer Architecture

"By taking a "street-wise" common-sense approach to high performance design strategies and comparing them to the expensive and maintenance intensive "green gizmos" approach being promoted by most, I will present to and help the participant critically determine what works - what is effective and long-lasting - and what may simply be 'hype' of the latest 'fad' product or method."

Peter Pfeiffer is a professional Architect, Building Scientist, Interior Designer, Property Manager and licensed Texas Real Estate professional practicing throughout North America. In 2004 he was named a Fellow of the American Institute of Architects for his lifelong achievements in "mainstreaming green building" – one of the first Architects in America to be recognized for such. Residential Architect magazine cited him as one of the ten most influential residential architects of the decade. In 2019 Peter was awarded the Green "Superhero" of the year by Green Builder magazine.
