

# Thomas Murrell - QuFresh

## USGBC Panel-Future of Green Technology Bio

Thomas (Tom) Murrell has been in the HVAC industry for over 30 years working with some of top HVAC contractors in the FWD region. Tom started as an installer, then service technician, service manager, general manager, senior vice president and president of these companies. He has also been a consultant and advisor to many of the HVAC equipment and control manufacturers in the US and served on several of their national advisory councils.

Tom does ventilation and HVAC training and educational classes for code officials, engineers, trade organizations and contractors in several US states. He is a member ASHRAE and the ICC. He is also an approved NATE Recognized Training Provider (RTP) for Ventilation.

Tom is currently President and founding partner of QuFresh Inc based in Irving, TX. QuFresh develops, promotes, educates and markets ventilation solutions.

### Product - Business

QuFresh developed and was first to market with their QFAM model fresh air unit by Air King America. The QFAM is an original concept for residential supply only ventilation. It is a self-contained, internally controlled fresh air unit for homes and apartments. QuFresh by Air King has multiple models with and without QControls that have different CFM settings, sizes and accessory options. The accessories include filtration of incoming air up with an internal 2-inch MERV 16 filter and the incorporation of independent controls.

QuFresh products are manufactured by Air King America in West Chester PA and available nationally thru mutple wholesale distributors.
